Lecture 15 Task

1) what from Collection applies thread safely?
Vector applies it and as stack is inherited from Vector it also applies it

2) Compare between vector and arraylist?

	Vector	Arraylist
Thread safe	✓	X
performance	slower as it applies thread safe (synch)	fast as it doesn't apply thread safe

3) Compare between arraydequeue and stack

	ArrayDequeue	stack
thread safe	X	✓
Performance	faster	slower
usage	stack + Queue	stack only
Null allowed	Not allowed	allowed
